

## THEROPODS- DEMO

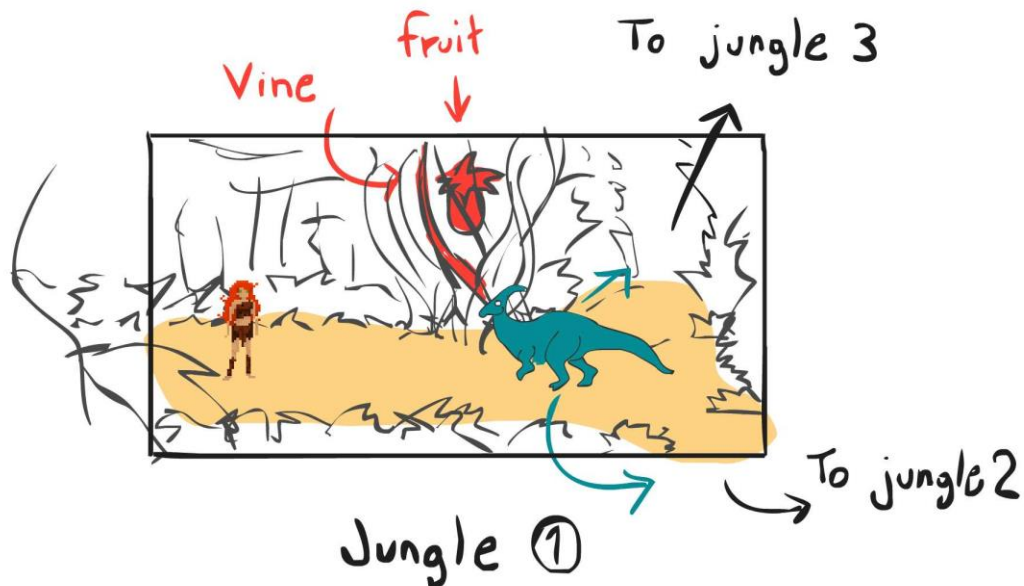

### Cut scene

Deep in the jungle, the Amazon jumps down from a tree, armed with a spear. She spots a dinosaur eating grass peacefully. She sneaks up behind him, but he gets alerted and runs away.

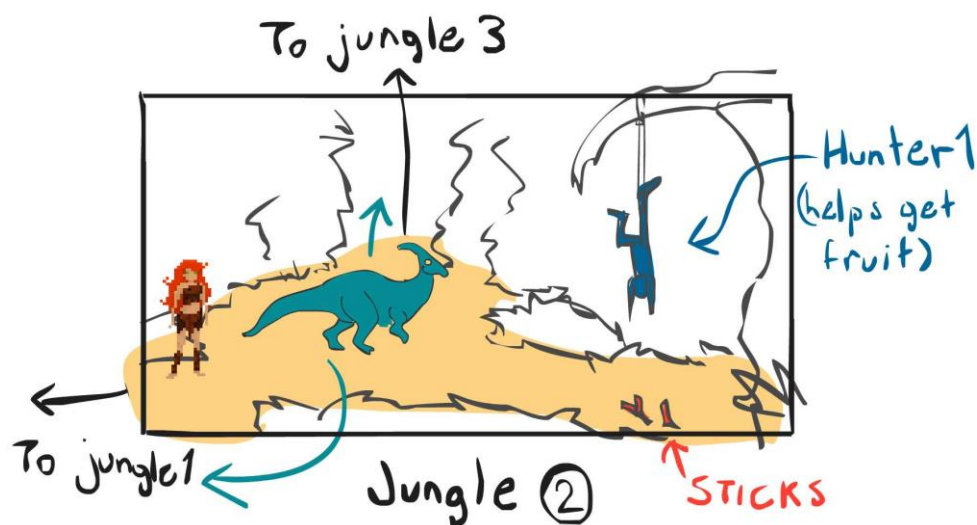

### Puzzle: Hunt the dinosaur

Jungle1 - The Amazon sees a bright red fruit hanging, but vines get in the way of reaching it. She tries and it looks like she can't do this alone. There are two areas to go to from here- right and top. She goes right.

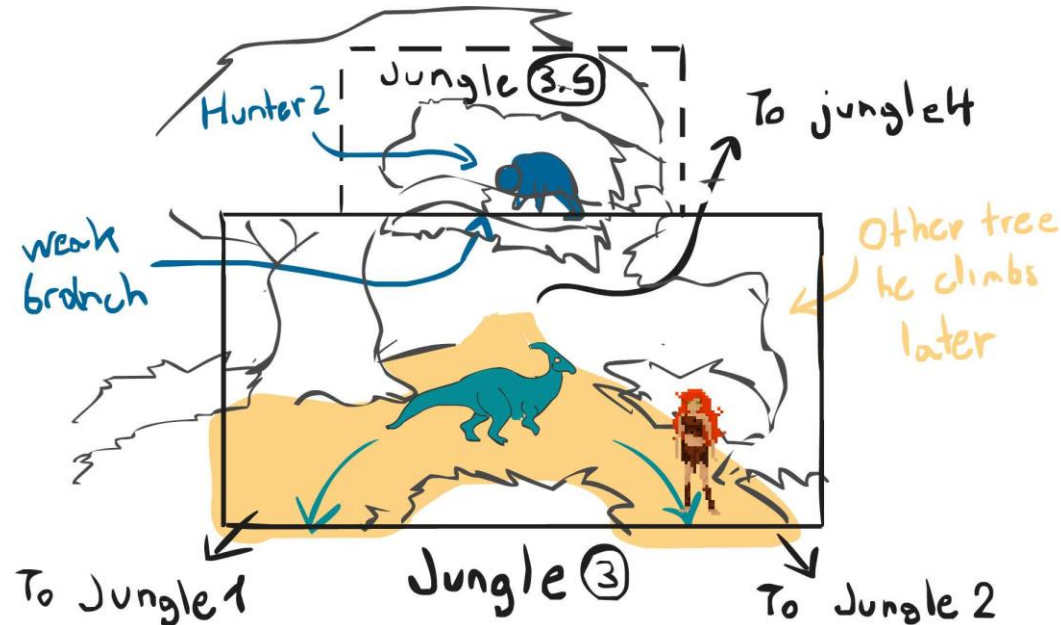

Jungle2 - In this jungle area, the Amazon can go top and left (where she came from). The dinosaur is standing there, munching grass. When the Amazon walks closer or tries to use her spear, it runs away (to the top).

We see another hunter, hanging upside down from a tree, caught in his own snare trap. The Amazon picks up a bunch of **STICKS** from the ground, remnants of the trap. She uses the **SPEAR** on the rope and frees the guy. She moves to the top.

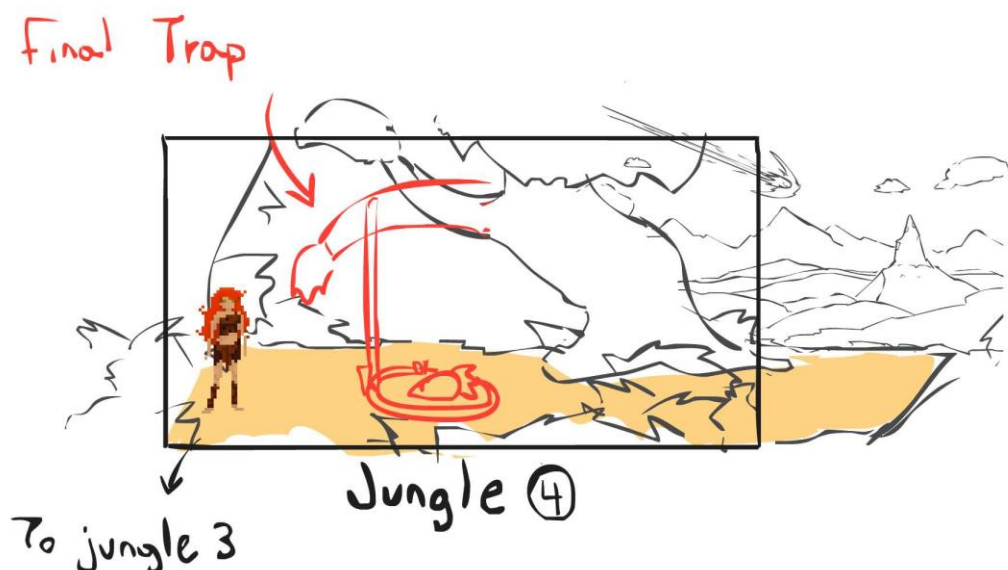

Jungle3 - From here, the amazon can go top, bottom left and bottom right (where she came from). The dinosaur is standing there. Out of a tree, a hunter jumps down at the dinosaur, who runs away to the bottom left. The hunter remains on the ground in pain for a few seconds, then gets up and climbs up the tree again.

The Amazon climbs the tree the hunter went up to.

Jungle3.5- In a dark tiny area inside the tree, the hunter is grabbing a branch, concentrated on his jump. When the Amazon attempts to talk to him, he tells her to go away.

Jungle4- The Amazon sees a thick-ish branch from a tree and grabs it, pulling it down. When she releases it, the branch springs up to its original position.

Back to Jungle2, the Amazon talks to the hunter she freed and asks for help with the fruit. He follows her to Jungle1, where holds the vines for her as she gets the FRUIT. One of the vines drops on the ground. The Amazon tries to pick it up, but it is still attached to the plant. She uses the **SPEAR** on the vine, cuts it out and picks up the **VINE**.

She goes to Jungle 4 and uses the **VINE** on the branch. She then uses the **STICKS** with the vine that is tied up to the branch, pulling down the branch and making a trap. She places the **FRUIT** in the trap carefully and walks back.

After walking back to the other areas, the Amazon notices a pattern- the dinosaur always runs away to the opposite way she comes from. He never runs to Jungle4, mainly because of the hunter scaring the dinosaur away.

On Jungle 3, the hunter jumps down and falls flat on his face once again. During that time, the Amazon climbs the tree he was on. She notices the branch is giving away a bit. She kicks it a couple of times and it gets more damaged, but the hunter climbs up and stops her. She gets down.

The next time she returns to Jungle 3, the hunter falls along with his branch. He can't get back up again to continue his plan. The Amazon suggests he climbs the other tree to the side. He does.

With the hunter now scaring the dinosaur from the right side of the screen and the Amazon arriving from the left side of the screen, the dinosaur has no way to go but top. He goes for the fruit and gets caught in the trap, grabbing its legs.

## **Outro**

The Amazon uses the SPEAR on him. As she does, the earth starts trembling and the sky lits up. A yellow comet is landing and heading right for the human village, where it crashes. She starts running back, then stops and looks at the trapped dino.

She uses the SPEAR on him. She cuts the vine and frees him, then she runs.
